

## Protecting The Nation. Protecting The People Who Protect The Nation.

Nova Datacom (NDC) is a leading provider of solutions that help our customers expand, improve, and strengthen their capabilities in order to exceed their mission assurance objectives. Offering expert-level proficiency and best practices across multiple technology segments, NDC is focused on four main practice areas: Business Continuity/Emergency Preparedness; Information Assurance; Governance, Risk, and Compliance; and Enterprise Networking.

Within each practice area, technologies such as virtualization, data center specialization, unified communications, VTC, network integration, enterprise architecture, and training/certification, are customized to provide tailored solutions for client environments.

Nova Datacom provides actionable intelligence regarding data access, usage, and storage, allowing secure information sharing in classified and unclassified environments. Representative customers include: 8th Army, 65th Medical Brigade, DISA, Bureau of Reclamation, DCMA, CENTCOM, RETN, Time Warner, and Verizon.

NDC's solutions are built upon a solid foundation of Program and Project Management to ensure customer requirements are met – on time and within budget – and all quality metrics are achieved. The company's Program Management Office (PMO) supports each project by providing standard templates, historical information, a Knowledge Management Center, and standardized policies and procedures.

NDC offers superior engineering strength, as reflected by the company's commitment to continued technology education. On staff are multiple Senior Security Analysts, able to support classified and unclassified programs. Additionally, the majority of NDC's engineers are Certified Information Systems Security Professionals (CISSPs) and hold a variety of other advanced certification across multiple disciplines (Cisco CCIE, Juniper's JNCIA and JNCIS)

### Featured Technology Partners:

 Cisco Gold Certified Partner; Certified Cisco360 Learning Partner - Cisco Systems is the worldwide leader in networking for the Internet. Today, networks are an essential part of business, education, government and home communications, and Cisco Internet Protocol-based (IP) networking solutions are the foundation of these networks. Cisco hardware, software, and service offerings are used to create Internet solutions that allow individuals, companies, and countries to increase productivity, improve customer satisfaction and strengthen competitive advantage.
