

Delivering Complete Mission Assurance Solutions

Nova Datacom (NDC) is a leading provider of solutions that help our customers expand, improve, and strengthen their capabilities in order to exceed their mission assurance objectives. Offering expert-level proficiency and best practices across multiple technology segments, NDC is focused on four main practice areas: Business Continuity/Emergency Preparedness; Information Assurance; Governance, Risk, and Compliance; and Enterprise Networking.

Within each practice area, technologies such as virtualization, data center specialization, unified communications, network integration, enterprise architecture, and training/certification, are customized to provide tailored solutions for client environments.

Partners such as Juniper, Cisco, Dell, and VMWare, work in tangent with NDC to maintain the highest levels of certification and past performance.

Business Continuity/ Emergency Preparedness

Nova Datacom created its Business Continuity and Emergency Preparedness (BCEP) system not only to make certain that government and business clients would be more resilient against potential threats and risks, but also to help preserve the trust and confidence of constituents, customers, and partners involved.

Program elements include:

- ❑ Continuity Policy and Procedures
- ❑ Continuity of Operations (COOP) and Continuity of Government (COG) Plans
- ❑ IT Disaster Recovery Plans
- ❑ Comprehensive Emergency Management Plans
- ❑ Building Occupant Evacuation Plans
- ❑ Emergency Operations Plans
- ❑ Emergency Management/Operations Center Design, Build-Out, O&M and Surge Support
- ❑ Hazard-Specific Contingency Plans
- ❑ Emergency Staff Augmentation
- ❑ Emergency Response Group (ERG) Readiness Reporting Dashboards
- ❑ Multi-Year Strategic or Program Management/Implementation Plans

Information Assurance

Nova Datacom provides actionable intelligence regarding data access, usage, and storage, allowing secure information sharing in classified and unclassified environments.

Services include:

- ❑ Cyber Security
- ❑ Enterprise Architecture
- ❑ Design and Secure Classified & Unclassified Environments
- ❑ Network Security Implementation
- ❑ Network Monitoring, Management and Optimization
- ❑ Vulnerability & Risk Assessment
- ❑ Independent Verification and Validation
- ❑ Certification and Accreditation
- ❑ Security Training and Awareness

Education Services

Directed by industry veteran, Scott Morris (Quad CCIE and CCDE), NDC offers a variety of training curriculums both through formal classroom instruction with full lab access, or on-site worldwide. Training offerings include:

- ❑ Instructor-led Training- As an authorized Cisco learning partner, Nova Datacom provides a full curriculum of public classes focused on the professional to expert level student.
- ❑ Self-Paced Training- Aimed at the student on the go, NDC has developed a collection of learning partner authorized training modules that can be accessed via a variety of web-based platforms. Instruction is at the student's own pace, through multiple subscription options, and offers access to supplemental training, lab materials and hands-on access to equipment.
- ❑ Custom/On-site Training- With expert-level veteran instructors offering unparalleled course delivery in both classified and non classified environments, NDC provides a customized training program in a location that maximizes your training dollars. Whether on-site, or remote, our enterprise-level training is consistently strong; we implement what we train and we train what we've experienced.

Solutions/Technologies

Nova Datacom has a proven integrated approach for Mission Assurance requirements. We continuously research and evolve our core technical competencies and best practices to deliver performance based results.

Our solutions include:

- ❑ Virtualization
- ❑ Unified Communications
- ❑ Data Center Analysis, Design, Consolidation
- ❑ Network Integration
- ❑ Enterprise Architecture

Enterprise Networking

The foundation of enterprise: networking. Nova Datacom provides scalable, robust network architecture design that can reduce your total cost of ownership, allow for technology expansion, and provide the network functionality you need now while not limiting your future options.

- ❑ Tailor network design to respond to changing business requirements
- ❑ Implement complex network upgrades, refreshes, expansions and consolidations
- ❑ Improve network availability and performance
- ❑ Simplify project coordination and accelerate implementation schedules
- ❑ Reduce the risks associated with making changes to the network
