

Delivering Complete Mission Assurance Solutions

Nova Datacom (NDC) is a leading provider of solutions that help our customers expand, improve, and strengthen their capabilities in order to exceed their mission assurance objectives. Offering expert-level proficiency and best practices across multiple technology segments, NDC is focused on four main practice areas: Business Continuity/Emergency Preparedness; Information Assurance; Governance, Risk, and Compliance; and Enterprise Networking.

Within each practice area, technologies such as virtualization, data center specialization, unified communications, network integration, enterprise architecture, and training/certification, are customized to provide tailored solutions for client environments. Partners such as Juniper, Cisco, Dell, and VMWare, work in tangent with NDC to maintain the highest levels of certification and past performance.

NDC At A Glance:

- ❑ **Founded in 2004**
- ❑ **Headquartered in Chantilly, VA**
- ❑ **SBA-Certified 8(a), Minority Woman-Owned SDB, w/ SDVOB Partnership**
- ❑ **Clearances held by DSS and DHS**
- ❑ **Superior Engineering Strength**

Why Work with Nova Datacom

- ❑ **Best People**- Our employees represent some of the best and brightest in the field. With multiple advanced certifications, our engineers are sought after not only for their experience, but also their innovative research and application of cutting edge methodologies and technologies.
- ❑ **Small Business with Big Business Acumen**- We believe our success stems from our flexibility, innovation, and deep expertise. While we have experienced exponential levels of growth, maintaining effective and nimble processes is our hallmark.
- ❑ **Established Partner Community**- We have consciously made the commitment and investment in multiple competing technology vendors to be able to provide the highest level of technical expertise, cost-effective solutions, and solutions based on client-driven requirements. As the only 8(a) Cisco Gold Partner and Juniper Elite Partner, we provide access to entire product lines at highly competitive price points.
- ❑ **Expansive Lab Capabilities**- To provide best of breed solutions and customized proof of concept demos to our clients, we heavily invest in our lab functionality and technologies to ensure engineering mastery. This not only allows our engineers the ability to stay ahead of new innovations, but also provides an environment in which they can truly understand the interoperability of competing and complementary technologies.

Past Performance

Transaction Network Services -Network Security , MPLS Core

U.S. Army – CONUS and OCONUS (Korea) – Disaster Recovery-IT; COOP

Monster Worldwide – Network Security , DDOS mitigation , Datacenter

RETN – MPLS Core, Metro Ethernet, Datacenter

State Department – Network Access Control (NAC) , IPSEC VPN

Defense Security Services – Enterprise IT Support Services -Network Security, Virtualization, I&A

Department of Homeland Security (NPPD) – I&A RETN – Network Security

Time Warner – Network Engineering

Verizon – Total Lifecycle Management: Data Destruction

DCMA – IA& Training

CENTCOM – Disaster Recovery; Data Backup for Use In-Theatre (Iraq)

CECOM (IMCOM-K) – Network Security

IPC Solutions- Global extranet provider for trading and financial markets. Core Network upgrade, MPLS, Expert level problem resolution
